

IST FOLIO

By Tam Cu

SL

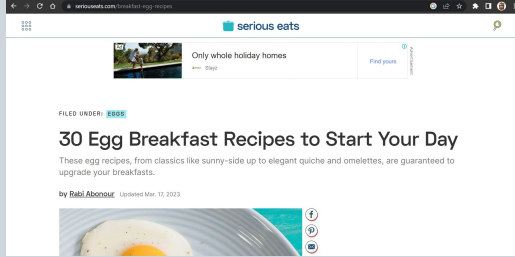

Statement of intent

I intend to make a website about how to cook eggs. The website will teach people how to cook eggs in different ways, such as how to make scrambled eggs, how to make boiled eggs, how to make omelets, poached eggs and more.

My website will include different types of recipes on how to make specific eggs including scrambled eggs, poached eggs, sunny side up, etc.

From visiting my website young people will be able to learn more about cooking different types of eggs. It can teach people who don't already know how to cook eggs, and it can also teach people to get into cooking by showing them simple egg recipes.

Existing Ideas

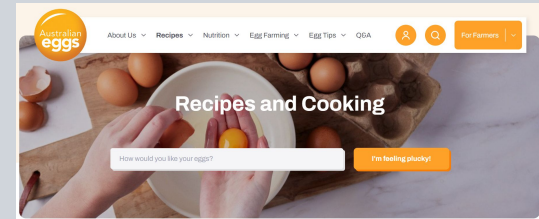

Existing Idea 1

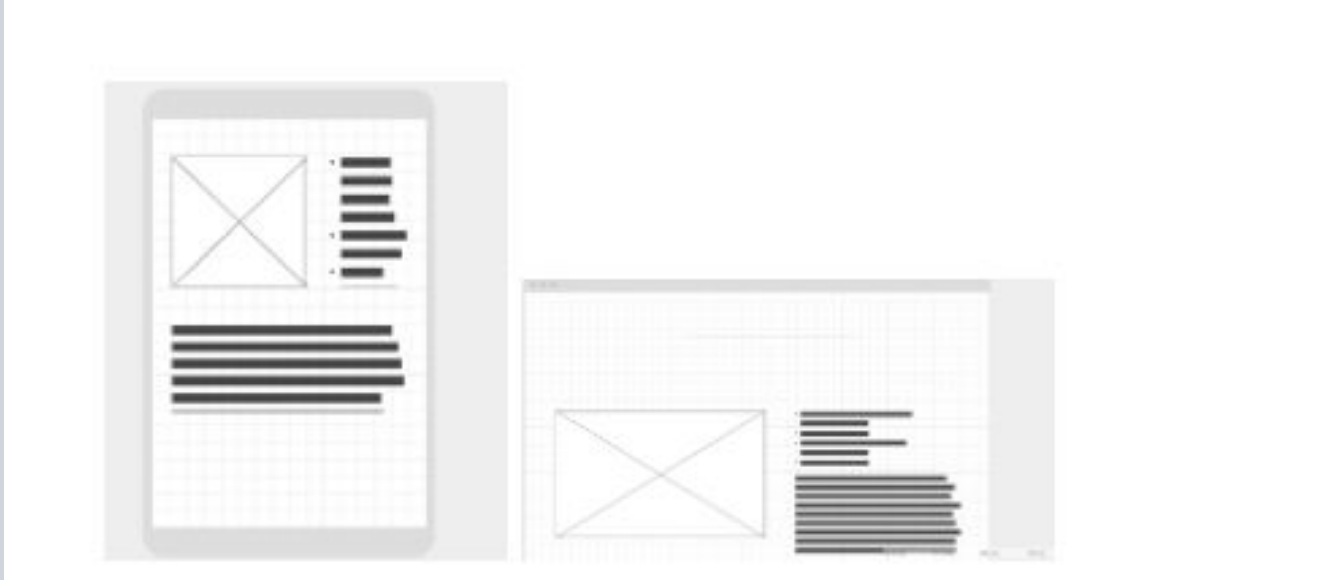

This website has many different egg recipes and they are easy to look for. The recipes are also attached to the image of the food and so I will try to implement and add more recipes

Existing Idea 2

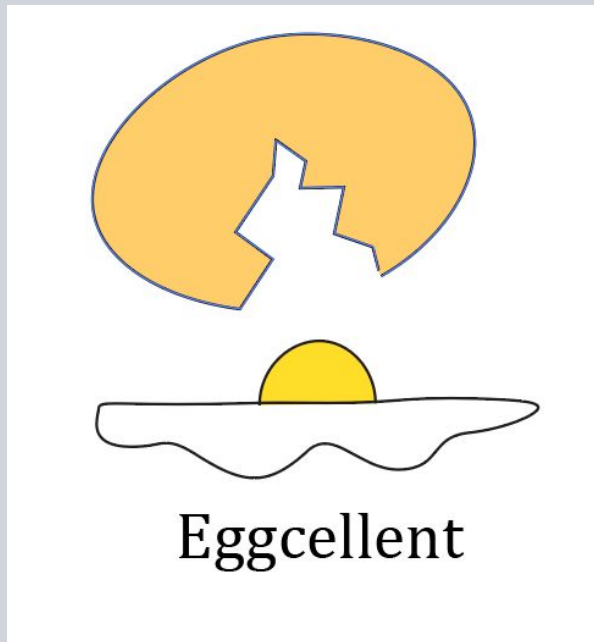

This website has an option to search up how you would like to cook your eggs but I think this will be too advanced for my coding skills

Wireframe of the homepage

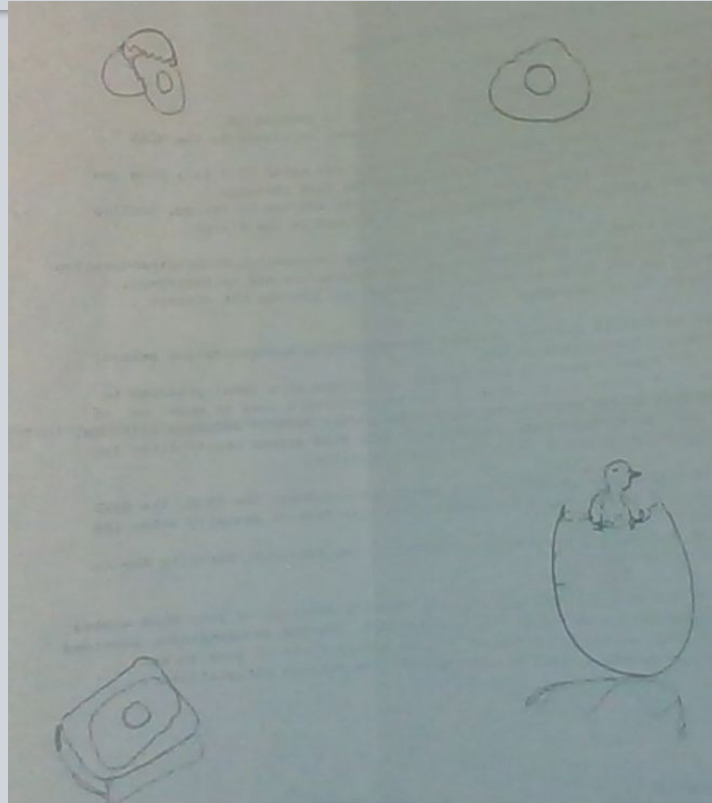

Favicon and logo

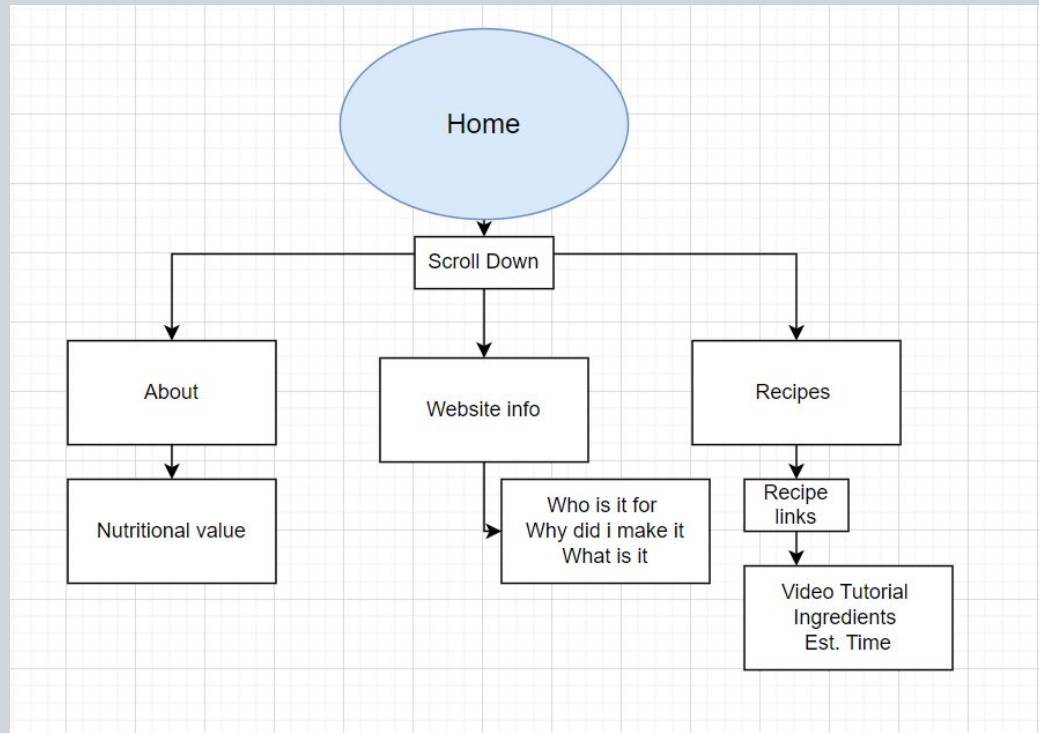

```
<link rel="apple-touch-icon"

Logo sketches

Site map

2x user persona's

As a cook, I want to learn how to cook different types of eggs so that I can cook for other people

As a kid who likes eating eggs, I want to learn how to cook eggs so that I can cook for myself
